

1 Introduction

This document describes the interfaces which are defined in xia2.

2 DataCollector

3 FrameProcessor

4 StrategyComputer

5 Indexer

6 Integrater

7 SubstructureFinder

An interface which presents options for obtaining a substructure.

8 MolecularReplacer

Something which does molecular replacement.

9 PhaseComputer

An interface (general) for basic phasing requirements. This may use, in addition, either substructure determination or molecular replacement.

10 PhaseImprover

Something which improves phases, e.g. through density modification.

11 MRPhaser

12 HAPhaser
