

User's Guide to biblatex-philosophy

Bibliography styles for (Italian) users of biblatex

Ivan Valbusa

ivan dot valbusa at univr dot it

v0.8f – 2013/06/20

Abstract

This package provides a small collection of bibliography and citation styles for use with Philipp Lehman's `biblatex` package. The styles follow the most popular conventions of the Italian publications but can be used in other languages too. They offer some useful features to compose detailed bibliographic entries including the translation data of foreign texts, annotations etc. Many options allow you to change the style defaults.

1 Introduction

1.1 License

Copyright © 2009-2010 Ivan Valbusa. This package is author-maintained. Permission is granted to copy, distribute and/or modify this software under the terms of the LaTeX Project Public License, version 1.3c.¹ This software is provided "as is", without warranty of any kind, either expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose.

1.2 Acknowledgments

The first step toward the creation of the `philosophy-modern` style (used for this documentation) was the request of Lorenzo Pantieri in the GJIT Forum: <http://www.guit.sssup.it/phpbb/viewtopic.php?t=6472>.² Now this is the bibliography style of *L'arte di scrivere con L^AT_EX*, the most popular Italian guide to L^AT_EX (Pantieri and Gordini 2011). I am very grateful to everybody who took part in the debate.

Many styles available in TeXLive inspired `biblatex-philosophy`, specifically: `dw` by Dominik Waßenhoven (2011), `mla` by James Clawson (2010) and `historian` by Sander Gliboff (2010).

1.3 Feedback

If you have any questions, feedback or requests please email me. My mail address is at the top of this document. If you need specific features not already implemented, remember to attach the example and `.bib` files.

1.4 Styles features

This package provides two author-year bibliography styles suitable for both text and footnotes citations (`philosophy-classic` e `philosophy-modern`; henceforth `classic` e `modern`) and a verbose

¹<http://www.ctan.org/tex-archive/macros/latex/base/lpp1.txt>.

²See the discussion on <http://www.guit.sssup.it/phpbb/viewtopic.php?t=6717>.

style appropriate for bibliographies supplied in the footnotes (*philosophy-verbose*; henceforth *verbose*).

These styles aim to match the needs of the Italian writers, particularly those concerned in the humanities (for example the comma is used to distinguish the units of the entry). Only the English and Italian support is available for now but you can use the styles with all the languages supported by *babel* (or *polyglossia*) adding simple redefinitions in the preamble of your document (section 10).

1.4.1 The *philosophy-classic* style

The *classic* style is a standard author-year style that uses commas instead of dots to separate the parts of the entry:

- Donald E. Knuth (1984Çf1986), *Computers & Typesetting*, 5 vols., Addison-Wesley, Reading, Mass.
- (1984) *Computers & Typesetting*, vol. A: *The TeXbook*, Addison-Wesley, Reading, Mass.
- (1986a) *Computers & Typesetting*, vol. B: *TeX: The Program*, Addison-Wesley, Reading, Mass.
- (1986b) *Computers & Typesetting*, vol. C: *The METAFONTbook*, Addison-Wesley, Reading, Mass.
- (1986c) *Computers & Typesetting*, vol. D: *METAFONT: The Program*, Addison-Wesley, Reading, Mass.
- (1986d) *Computers & Typesetting*, vol. E: *Computer Modern Typefaces*, Addison-Wesley, Reading, Mass.

It is associated to a compact citation scheme which allows to cite multiple entries of the same author and/or published in the same year, omitting some redundant informations:

Knuth (1984, 1986a,b,c,d)

1.4.2 The philosophy-modern style

The modern style uses the classic style for the citations but produces a fancy bibliography divided into blocks, which is particularly suited for bibliographies with many entries for the same author:

Donald E. Knuth

- 1984Çf¹1986 *Computers & Typesetting*, 5 vols., Addison-Wesley, Reading, Mass.
- 1984 *Computers & Typesetting*, vol. A: *The TeXbook*, Addison-Wesley, Reading, Mass.
- 1986a *Computers & Typesetting*, vol. B: *TeX: The Program*, Addison-Wesley, Reading, Mass.
- 1986b *Computers & Typesetting*, vol. C: *The METAFONTbook*, Addison-Wesley, Reading, Mass.
- 1986c *Computers & Typesetting*, vol. D: *METAFONT: The Program*, Addison-Wesley, Reading, Mass.
- 1986d *Computers & Typesetting*, vol. E: *Computer Modern Typefaces*, Addison- Wesley, Reading, Mass.

1.4.3 The philosophy-verbose style

This style is aimed for citations given in the footnotes and follows the most popular scheme used in the Italian humanities.

It prints a full citation similar to a bibliography entry when an item is cited for the first time, and a short citation afterwards, using the title (possibly shortened in the `shorttitle` field), followed by the string “cit.”. Citing the same entry two times, in the second one the string “Ivi” is used; citing the same place of the previous citation you will have “Ibidem”:

¹ Cfr. Cartesio, *Discorso sul metodo*, trad. e introd. di Lucia Urbani Ulivi, 1^a ed., testo francese a fronte, Bompiani, Milano 2002, p. 43.

² Ivi, p. 26.

³ Ibidem.

⁴ Settimo Termini, “Vita morte e miracoli di Alan Mathison Turing”™, in *Vite matematiche*.

Protagonisti del '900 da Hilbert a Wiles, a cura di Claudio Bartocci *et al.*, Springer-Verlag Italia, Milano 2007, pp. 59-61.

⁵ Cartesio, *Discorso sul metodo* cit., p. 35.

When there is only one entry for the same author, with the `singletitle=true` option the string “op. cit.” is used instead of the (short) title followed by “cit.”:

⁶ Cartesio, op. cit., p. 35.

All the scholarly abbreviations (*latinitates*) but “cit.” are printed by default in normal font. With the `latinemph` option (section 4.2.2) you can get them in italic shape.

1.5 Use

To ensure Italian-style quotation marks, you need to call the `babel` and `csquotes` packages in the preamble of your `\LaTeX` document:

```
\usepackage[italian]{babel}
\usepackage[style=italian]{csquotes}
\usepackage[style=philosophy-<style>,backend=biber]{biblatex}
\addbibresource{<bibfile>.bib}
```

Replace “`<style>`” with `classic`, `modern` or `verbose`, and “`<bibfile>`” with the name of your bibliography file (“`.bib`” must be declared).

To uniform the style of quotation marks in multilingual bibliographies typeset using the `babel=other` package option, you can use the following commands:

```
\DeclareQuoteAlias{italian}{french}
\DeclareQuoteAlias{italian}{german}
\DeclareQuoteAlias{italian}{...}
```

The philosophy styles require biber so remember to configure your editor properly. If you prefer bibtex you have to declare it with the backend=bibtex option but some bibliography drivers will not work properly.

2 Translations and original editions

The philosophy styles use the mechanism provided by the related field to typeset complex entries comprising both the original publication data and the translation data (Poincaré 1968).³

Jules-Henri Poincaré (1968), *La science et l'hypothèse*, Flammarion, Paris; trans. as *La scienza e l'ipotesi*, ed. by Corrado Sinigaglia, Bompiani, Milano 2003.

```
@book{Poincare:1968-ORIG,
  author = {Jules-Henri Poincaré},
  title = {La science et l'hypothèse},
  publisher = {Flammarion},
  location = {Paris},
  date = {1968},
  related = {Poincare:1968-ITA}}}

@book{Poincare:1968-ITA,
  author = {Jules-Henri Poincaré},
  editor = {Corrado Sinigaglia},
  title = {La scienza e l'ipotesi},
  publisher = {Bompiani},
  location = {Milano}}
```

With Biber 1.6 you can have cascading relations too (Popper 1934).⁴

³Previous versions of the styles provided a different mechanism to manage translations. This feature is now deprecated and it is still supported only for backward compatibility. See section 11.1 for details.

⁴Download biber 1.6 binary for your platform from SourceForge and drop this over /usr/texbin/biber.

```

@Book{key1,
...
related = {key2},
...
}
@Book{key2,
...
related = {key3},
...
}

```

The related entry is preceded by the `translationas` string which defaults to “trad. it.” for Italian documents and “trans. as” for English documents. If you want to change it, use the `relatedstring` field. For example:

```

@book{Poincare:1968-ORIG,
author = {Jules-Henri Poincaré},
...
related = {Poincare:1968-ITA},
relatedstring = {ed.^it.})

```

3 Style-specific fields

`library` field (literal)

This field is printed at the end of the entry, in a new period. It is aimed for secondary informations such as the location of the texts, historical notes, etc. (cf Heidegger 2001).

`annotation/annotate` field (literal)

This field is printed in a new paragraph at the very end of the entry. It requires the `annotation` package option. The default font can be changed redefining the `\annotationfont` command (section 5). See the examples in the references of this documentation.

`nameaddon` field (literal)

An addon to be printed immediately after the author name in the bibliography. It is useful for those author known with alias, Latinized names, etc. (☞ Komensky 1969).

`entrysubtype` field (literal)

This feature is active only for the `classic` and `modern` styles. With the `classic` value the citation commands will produce an author-title label. This is useful for citing works from classical antiquity, such as ☞ Aristotle 1929:

```
@book{aristotle:physics,  
  entrysubtype = {classic},  
  author = {Aristotle},  
  title = {Physics},  
  ...  
}
```

In the bibliography the entry is printed with the author-year label, but with the `skipbib` option in the `options` field you can exclude it from the bibliography.

4 Package options

4.1 Global options

`relatedformat=semicolon, parens, brackets` default: `semicolon`

`semicolon` The “related” entry data are preceded by a semicolon.

`parens` Puts the “related” entry data in parentheses.

`brackets` Same as the previous option but with brackets.

`shorthandintro=true, false` default: `true`

`true` Prints a language-specific expression such as “hence- forth cited as [<shorthand>]” to introduce shorthands on the first citation. You can overwrite the default expression using the `shorthandintro` field. Note that the alternative expression must include the shorthand.

Kant (1968a [henceforth cited as KpV])

`false` Does not print the intro to the shorthand. This option requires a list of shorthands (`\printshorthand` command).

`scauthors=true, false` default: false

Prints the names (author, editor, etc.) at the beginning of the entry in small caps shape, both in citations and in bibliography:

If you want *all* the names (translator, commentator, etc.) in small caps, you have to redefine the `\mkbibname...` commands (see `biblatex` documentation for details).

`scauthorsbib=true, false` default: false

Same as the previous, but only for the bibliography.

`scauthorscite=true, false` default: false

Same as the previous, but only for the citations.

`publocformat=publocyear, locpubyear, loccolonpub` default: publocyear

This option provides three styles for typesetting the “publisher/location/date” block. It is active also for the related entry (see above) and for the `orig`-fields (see section 11.1).

`publocyear` Oxford University Press, Oxford 2007

`locpubyear` Oxford, Oxford University Press, 2007

`loccolonpub` Oxford: Oxford University Press, 2007

`volnumformat`=*strings*, *parens*, *default* default: plain

This option provides three styles for typesetting the “volume/number” block in @article entries.

- `plain` ... *Journal Title*, 5, 8, ...
- `strings` ... *Journal Title*, vol. 5, n. 8, ...
- `parens` ... *Journal Title* (5, 8), ...

You can combine this option with `volumeformat` options and re-defining the `\volnumpunct` command you can get other styles (see section 6):

```
... Journal Title, 5/8, ...
... Journal Title, V/8, ...
... Journal Title (5/8), ...
... Journal Title (V/8), ...
```

`volumeformat`=*roman*, *romanupp*, *romansc*, *arabic* default: arabic

This option provides three styles for typesetting the `volume` field:

- `arabic` ... *Book Title*, vol. 5, ...
- `roman` ... *Book Title*, vol. iv, ...
- `romansc` ... *Book Title*, vol. xi, ...
- `romanupp` ... *Book Title*, vol. X, ...

With the command

```
\DeclareFieldFormat{volume}{\bibstring{volume}~#1}
```

you can restore the default format for all but @article entries.

`editionformat=roman, romanupp, romansc, arabic` default: `arabic`

This option provides three styles for typesetting the `edition` field:

`arabic` ... *Book Title*, 5^a ed., ...

`roman` ... *Book Title*, iii ed., ...

`romansc` ... *Book Title*, xi ed., ...

`romanupp` ... *Book Title*, X ed., ...

`inbeforejournal=true, false` default: `false`

Prints the string “in” before the `journaltitle` in the `@article` entries.

`annotation=true, false` default: `false`

Shows the `annotation` field, only in the bibliography (see also section 3).

`library=true, false` default: `true`

Shows the `library` field, both in the bibliography and in the citations (see also section 3).

4.2 Style-specific options

4.2.1 philosophy-classic and philosophy-modern

`square=true, false` default: `false`

Uses brackets instead of parentheses in the citations and in the author-year label used in the bibliography.

`yearleft=true, false` default: `false`

Prints the date flushed left in the bibliography.

`restoreclassic=true, false` default: true

This option can be given as an optional argument of `\printbibliography`:

```
\printbibliography[restoreclassic]
```

It restores the `classic` style in a document typeset using the `modern` style. It is useful to compose a “Web List” like that at the end of this document (active only for the `philosophy-modern`).

`nodate=true, false` default: true

Prints the `nodate` string when year or date is missing.

4.2.2 philosophy-verbose

`latinemph=true, false` default: false

Prints the *latinitates* “ivi” and “ibidem” in italic shape.

`commacit=true, false` default: false

Adds a comma at the end of the `shorttitle` field when this is followed by the string *cit.*: “Descartes, *Discours de la méthode*, cit.”.

5 New commands

`\annotationfont{\langle code\rangle}` default: `\footnotesize`

The font of the `annotation` field. It can be redefined with:

```
\renewcommand*{\annotationfont}{\normalsize\sffamily}
```

```
\libraryfont{\code} default: \normalfont
```

The font of the `library` field. It can be redefined with:

```
\renewcommand*\libraryfont{\sffamily}
```

```
\volnumpunct{\code} default: \addcomma\space
```

The separator between `volume` and `number` in `@article` entries. It can be redefined with:

```
\renewcommand*\volnumpunct{/}
```

6 New lengths

The new lengths described in this section are defined only for the `modern` style. For the other customizable lengths see the `biblatex` documentation (Lehman 2011).

`\postnamesep` The space between author (or editor) and the first entry relating to him.

`\yeartitle` The space between year and title.

The `modern` style redefines also the following `biblatex` lengths:

`\bibnamesep` The vertical space between two blocks of authors.

`\bibitemsep` The vertical space between the individual entries in the bibliography.

`\bibhang` The hanging indentation of the bibliography.

These are the default values for the lengths used by `modern` style:

```
\setlength{\yeartitle}{0.8em}
\setlength{\postnamesep}{0.5ex plus 2pt minus 1pt}
\setlength{\bibitemsep}{\postnamesep}
\setlength{\bibnamesep}{1.5ex plus 2pt minus 1pt}
\setlength{\bibhang}{4\parindent}
```

If you want to change them past these codes in the preamble of your document and modify the values according to your needs.

7 New citation commands

`\sdcite{<key>}`

Uses an author-title label instead of an author-year label (defined only for the `classic` and `modern` styles). It is useful for some classical or undated works (see section 8). Writing `\sdcite[15]{guzman:sd}` you will obtain: Guzmán de Rojas, *Problemática*. This command is deprecated. Use the `entrysubtype` field instead (see section 3).

`\footcitet{<key>}`

Same as `\footcite`,⁵ but with the `\textcite` style.⁶ (defined only for the `classic` and `modern` styles).

`\ccite{<key>}`

The same as `\cite`, but omits the author's (editor's) name (defined only for the `verbose` style). Here is an example:

```
This topic is discussed in \cite{Rossi:2007} and in the recent  
\ccite{Rossi:2008}.
```

This topic is discussed in P. Rossi, *History of Types*, La TeXnica, Verona 2007 and in the recent *Types of History*, Typographica, Milano 2008.

8 Classical and undated works

The treatment of the classical works and other writings with uncertain or omitted date is particularly difficult and inevitably imposes some choices.

⁵Corrocher 2009, pp. 12-13.

⁶Corrocher (2009, pp. 12-13).

If there is a critical edition you should cite it directly, such as `\Heidegger (2001)`. If you do not like this anachronistic label you may use the `shorthand` field, such as `\Kant (1968b [henceforth cited as KpV])`. Note that a “shorthand intro” is automatically printed when the entry is cited for the first time and omitted afterwards. To turn off this capability load the option `shorthandintro=false`. In this case you will need a list of shorthands (`\printshorthands` command). If you do not like these solutions you can use the `entrysubtype` field with `classic` value (see section 3) or the `\sdcite` command (section 7).

9 Crossreferences

The `philosophy` styles allow you to manage entries referring to other entries through the `crossref` fields. This is very useful when you have to cite two or more `@incollection` of the same `@collection` (`\Corrocher 2009; Federspil and Vettor 2009`). In this way the `@collection` is printed in the bibliography and is cross-referenced inside the `@incollection`, using the corresponding author-year label (the mechanism is the same for `@inbook` items).

When you have to cite only one `@incollection` of a single `@collection` you have three choices:

1. use the `crossref` field (`\Rossitto 1977; Termini 2007`). In this case all the `@collection` data are automatically printed inside the `@incollection` entry;
2. put the `@collection` data in the fields of the `@incollection` entry (`\Valbusa 2007`). In this case the `@incollection` is self-contained;
3. put the `@collection` data in the fields of the `@incollection` entry and put the `@collection` label in the `xref` field of the `@incollection` (`\Kant 1968c,d`).

With the `verbose` style, when citing `@incollections` entries, the data of the `@collection` are printed entirely in the first citation and shortened afterwards. Anyway in the final bibliography the `@incollection` is always complete of all the informations about the corresponding `@collection`.

10 Using the styles with other languages

The philosophy styles can be used for both Italian and English documents simply loading the babel package (or polyglossia).

In order to use the styles with different languages, you have to define all the string not defined in the language used in the preamble of your document. This is a sample code for using the styles in german documents:

```
\NewBibliographyString{edorig,cit,reviewof,nodate}
\DefineBibliographyStrings{german}{%
  inherit={german},
  translationas = {deut\addotspace \"Ubers\adddot},
  edorig = {...},
  cit = {...},
  reviewof {...},
  nodate ={...}}
```

11 Backward compatibility

This section explain a different mechanism (now deprecated) to manage entries comprising both the original publication data and the translation data. This mechanism uses some special fields.

11.1 Deprecated fields

The following fields can hold the translation or the original edition data. They are precede by the string “trans.” or “orig. ed.”, respectively according to the origfields=trans (default) or origfields=origed option (see below).

origtitle field (literal)
transtitle field (list biber only)

The title of the translation/original edition.

origpublisher field (list)

transpublisher field (list biber only)

The publisher of the translation/original edition.

origlocation field (list)

translocation field (list biber only)

The location of the translation/original edition.

origdate field (range)

transdate field (range biber only)

The publication date of the translation/original edition.

Robert Bringhurst (1992), *The Elements of Typographic Style*, Hartley & Marks Publisher Inc., Vancouver, Canada; trad. it. *Gli elementi dello stile tipografico*, Sylvestre Bonnard, Milano 2009.

reprinttitle field (literal)

If the work has a reprint, the title of the reprint. It can not be used together with the origtitle field.

usera field (literal)

origbooktitle field (literal biber only)

transbooktitle field (literal biber only)

The title of the @collection in which the translation/original edition of an @article (@inbook or @incollection) is published. The field is printed after the origtitle/transtitle and the format is the same of the entry:

Moore, George Edward (1903), «The refutation of idealism», *Mind*, N.S., 12 (mag. 1903), p. 433-453; trad. it. «La confutazione dell'idealismo», in *Il Neoempirismo*, a cura di Alberto Pasquinelli, UTET, Torino 1969, p. 35-61.

```
userb field (literal)
orignote field (literal biber only)
transnote field (literal biber only)
```

This field is printed after the `origtitle`/`transtitle`. It is meant for secondary informations about the translation/original edition, such as the name of editors, translators, etc.:

Mach, E. (1883), *Die Mechanik in ihrer Entwicklung historisch-kritisch dargestellt*; trad. it. *La meccanica nel suo sviluppo storico-critico*, traduzione, introduzione e note di Alfonsina D'Elia, Bollati Boringhieri, Torino 1977.

```
userc field (literal)
origpages field (literal biber only)
transpages field (literal biber only)
```

This field is printed at the end of the entry, after the `origdate`/`transdate` field. It is meant for the page range of the translation/original edition or other useful informations. In the first case string “p.” is omitted.

Warning The `origdate`/`transdate` is needed in order to print these fields. Contrarily they will be ignored.

11.2 Deprecated options

`origfields=trans, none, edorig` default: `trans`

- | | |
|-------------------|---------------------------------------|
| <code>true</code> | Prints the <code>orig-</code> fields. |
| <code>none</code> | Omits the <code>orig-</code> fields. |

origed This option cites the translation data first and adds the original publication data at the end of the entry, preceded by the string “orig. ed” (or “ed. orig.” for Italian documents).

origed=true, false default: true

Same as the previous but can be set on a per-entry basis in the options field. (see Lobačevskij 1994).

origfieldsformat=semicolon, parens, brackets default: semicolon

semicolon The translation/original publication data are preceded by a semicolon:

Poincaré, Jules-Henri (1968), *La science et l'hypothèse*, Paris, Flammarion; trad. it. *La scienza e l'ipotesi*, Milano, Bompiani 2003.

parens Puts the translation or the original publication data in parentheses:

Poincaré, Jules-Henri (1968), *La science et l'hypothèse*, Paris, Flammarion (trad. it. *La scienza e l'ipotesi*, Milano, Bompiani 2003).

brackets Same as the previous option but with brackets instead of parentheses:

Poincaré, Jules-Henri (1968), *La science et l'hypothèse*, Paris, Flammarion [trad. it. *La scienza e l'ipotesi*, Milano, Bompiani 2003].

Waßenhoven, Dominik

- 2011 *biblatex-dw*, version 1.4, <http://tug.ctan.org/tex-archive/macros/latex/exptl/biblatex-contrib/biblatex-dw>.

A small collection of styles for the biblatex package. It was designed for citations in the Humanities and offers some features that are not provided by the standard biblatex styles.

Examples

See also `philosophy-examples.bib` in the “`texm-dist/doc/latex/biblatex-philosophy`” directory of your TeXLive installation.

Aristotle

- 1929 *Physics*, trans. by P. H. Wicksteed and F. M. Cornford, G. P. Putnam, New York.
A book entry with a `translator` field.

Corrocher, Roberto

- 2009 “Riflessioni sull’uomo di fronte a nuove sfide”, in Giaretta *et al.* (2009), pp. 27-42.
An `@incollection` entry. The `@collection` is automatically printed in the bibliography because another `@incollection` has been cited.

Federspil, Giovanni and Roberto Vettor

- 2009 “Medicina: un unico metodo e una sola argomentazione?”, in Giaretta *et al.* (2009), pp. 43-74.
An `@incollection` entry. The `@collection` is automatically printed in the bibliography because another `@incollection` has been cited.

Giaretta, Pierdaniele, Antonio Moretto, Gian Franco Gensini, and Marco Trabucchi

- 2009 (eds.), *Filosofia delle medicina. Metodo, modelli, cura ed errori*, 2 vols., il Mulino, Bologna.
A collection with four editors. The list is automatically truncated in the citations.

Guzmán de Rojas, Iván

- s.d. *Problemática lógico-lingüística de la comunicación social con el pueblo Aymara*, mimeo, Con los auspicios del Centro internacional de Investigaciones para el Desarrollo de Canadá.

A work without a publication date. The string `nodate` (localized) is automatically printed.

Heidegger, Martin

- 2001 *Sein und Zeit*, 18th ed., Max Niemeyer Verlag, Tübingen. Apparso originariamente nel 1927 nell'annuario diretto da H. Husserl *Jahrbuch für Philosophie und phänomenologische Forschung* (vol. VIII).

Note the `library` field, use for some details about the first edition.

Kant, Immanuel

- 1968a *Kants Werke. Akademie Textausgabe*, Berlin.
- 1968b *Kritik der praktischen Vernunft*, in *Kants Werke. Akademie Textausgabe*, vol. 5: *Kritik der praktischen Vernunft. Kritik der Urtheilskraft*, Walter de Gruyter, Berlin, pp. 1-163.
An edition of Kant's *Collected Works*, volume five. This is an `inbook` entry which explicitly refers to the *Critique of Practical Reason* only, not to the entire fifth volume. Note the `author` and `bookauthor` fields in the database file. By default, the `bookauthor` is omitted if the values of the `author` and `bookauthor` fields are identical.
- 1968c *Kritik der praktischen Vernunft*, in Kant (1968a), vol. 5, pp. 1-163.
- 1968d *Kritik der Urtheilskraft*, in Kant (1968a), vol. 5, pp. 165-485.

Komensky, Jan Amos [Comenio]

- 1969 *Opera Omnia*, Praga.

This author is known with his Latin name, given in the `nameaddon` field.

Lobačevskij, Nikolaj Ivanovič

- 1994 *Nuovi principi della geometria. Con una teoria completa delle parallele*, ed. by Lucio Lombardo Radice, with a forew. by Evandro Agazzi, Bollati Boringhieri, Torino; orig. ed. 1835.

An entry typeset using the deprecated `orig-` fields mechanism.

Poincaré, Jules-Henri

- 1968 *La science et l'hypothèse*, Flammarion, Paris; trans. *La scienza e l'ipotesi*, ed. by Corrado Sinigaglia, testo greco a fronte, Bompiani, Milano 2003.

A book entry followed by its translation, cross-referenced in the `related` field.

Popper, Karl R.

- 1934 *Logik der Forschung*, Springer, Wien; trad. ingl. *The Logic of Scientific Discovery*, 3rd ed., Hutchinson, London 1959; trans. *Logica della scoperta scientifica*, 3rd ed., Einaudi, Torino 1998.

A book entry followed by two different translations, cross-referenced in the related (biber 1.6 required).

Rossitto, Cristina

- 1977 “Opposizione e non contraddizione nella *Metafisica* di Aristotele”, in *La contraddizione*, ed. by Enrico Berti, Città Nuova, Roma, pp. 43-69.

Note that the @collection data (inherited from the crossref field) are printed inside the @incollection entry because this is the only @incollection cited from that @collection.

Termini, Settimo

- 2007 “Vita morte e miracoli di Alan Mathison Turing”, in *Vite matematiche. Protagonisti del '900 da Hilbert a Wiles*, ed. by Claudio Bartocci, Renato Betti, Angelo Guerraggio, and Roberto Lucchetti, Springer-Verlag Italia, Milano.

Valbusa, Ivan

- 2007 “Psicologia e sistema in Alsted e in Wolff”, in *Christian Wolff tra psicologia empirica e psicologia razionale*, ed. by Ferdinando Luigi Marcolungo, Georg Olms Verlag, Hildesheim, Zürich, and London.

Web List

CTAN (2006), *CTAN. The Comprehensive TeX Archive Network*, <http://www.ctan.org> (visited on 10/01/2006).

Note the urldate field and the label field, used for the citations.

GuIT. *Gruppo degli Utilizzatori Italiani di TeX* (2012), <http://www.guitex.org> (visited on 01/15/2012).

A Web site.

12 The Code

1456 }

```

The classic and modern styles redefine the `relateddate` and `commarelateddate` macros because the date have to be printed after the name of the author/editor. In the list of shorthands we need a standard entry, with the date at the end and no date after the name of the author/editor so we overwrite these macros locally:

```

1457 \AtBeginShorthands{%
1458 \togglefalse{bbx:annotation}%
1459 \renewcommand{\labelnamepunct}{\addcomma\space}%
1460 \renewbibmacro*{relateddate}{%
1461   \setunit*\{\addspace\}%
1462   \printdate}%
1463 \renewbibmacro*{commarelateddate}{%
1464   \setunit*\{\addcomma\space\}%
1465   \printdate}%
1466 \DeclareCiteCommand{\bbx@crossref@inbook}%
1467  {}%
1468  {\iffieldundef{shorthand}{%

12.2.2 New macros

Renew the bibliography macro 'relateddate' to delete the date at the end of the entry:

```

1523 \renewbibmacro*[relateddate]{}
1524 \renewbibmacro*[commarelateddate]{}

```

Dates

```

1525 \renewbibmacro*[issue+date]{%
1526   \ifboolexpr{%
1527     test {\iffieldundef{issue}}%
1528     and%
1529     test {\iffieldundef{month}}%
1530   }%
1531   {}%
1532   {\ifdefstring{\bbx@volnumformat}{parens}{%
1533     \printtext{%
1534       \printfield{issue}\setunit*\{\addspace}%
1535       \printdate}}%
1536     {\printtext[pureparens]{%
1537       \printfield{issue}\setunit*\{\addspace}%
1538       \printdate}}%
1539   \newunit}%

```

Delete “month” from \printdateextra to print open ranges such as: “1968-”:

```
1540 \renewbibmacro*{date+extrayear}{%
1541     \begingroup%
1542         \clearfield{month}%
1543         \clearfield{day}%

```

The `restoreclassic` option is redundant for the philosophy-classic style. Anyway it is defined to avoid error messages:

```

1625 \define@key{blx@bib1}{restoreclassic}{}{%
1626 \define@key{blx@bib2}{restoreclassic}[true]{}}

```

12.2.4 The `nodate` option for `\printbibliography`

```

1627 \define@key{blx@bib1}{nodate}{}{%
1628 \define@key{blx@bib2}{nodate}[true]{%
1629   \ifstrequal{\#1}{false}{%
1630     \togglefalse{bbx:nodate}}}

```

```
1631 }{}}%
```

12.3 philosophy-modern.bbx

12.3.1 Initial settings

```
1632 \RequireBibliographyStyle{philosophy-classic}
```

The modern style has only one specific option which is turned off by default:

```
1633 \newtoggle{bbx:yearleft}
1634 \DeclareBibliographyOption{yearleft}[true]{%
1635   \settoggle{bbx:yearleft}{#1}}
1636 \ExecuteBibliographyOptions{%
1637   yearleft=false}
```

12.3.2 New lengths

```
1638 \newlength{\yeartitle}
1639 \newlength{\postnamesep}
1640 \setlength{\yeartitle}{0.8em}
1641 \setlength{\postnamesep}{0.5ex plus 2pt minus 1pt}
1642 \setlength{\bibitemsep}{\postnamesep}
1643 \setlength{\bibnamesep}{1.5ex plus 2pt minus 1pt}
1644 \setlength{\bibhang}{4\parindent}
1645
1646 \AtBeginBibliography{%
1647 \iftoggle{bbx:yearleft}{%

In the list of shorthands we always use the shorthand for the cross-referenced entries:

```

1842 \DeclareCiteCommand{\bbx@crossref@inbook}%
1843 {}%
1844 {\iffieldundef{shorthand}%
1845   {\usebibmacro{inbook:full}}%
1846   {\usebibmacro{cite:shorthand}}}%
1847 {}%
1848 {}%
1849 \DeclareCiteCommand{\bbx@crossref@incollection}%
1850 {}%
1851 {\iffieldundef{shorthand}%
1852   {\usebibmacro{incollection:full}}%
1853   {\usebibmacro{cite:shorthand}}}%
1854 {}%
1855 {}%
1856 }

```

Authors and editors

```

1857 \renewbibmacro*{author}{%

2160                 \multicitedelim}}}}

```

The `cite:shorthand` is the same for both author-title and author-year styles:

```

2161 \renewbibmacro*{cite:shorthand}{%
2162     \printtext[bibhyperref]{\printfield{shorthand}}}

```

If the field `entrysubtype` equals to `classic` the citation commands will use the author-title macros:

```

2163 \renewbibmacro*{cite:init}{%

```

```

2164  \switchclass{cite:init:AT}{cite:init:AY}}
2165 \renewbibmacro*{cite:reinit}{%
2166   \switchclass{cite:reinit:AT}{cite:reinit:AY}}
2167 \renewbibmacro*{cite}{%
2168   \switchclass{cite:AT}{cite:AY}}
2169 \renewbibmacro*{textcite}{%
2170   \switchclass{textcite:AT}{textcite:AY}}
2171 \renewbibmacro*{textcite:postnote}{%
2172   \switchclass{textcite:postnote:AT}{textcite:postnote:AY}}
2173
2174 \newbibmacro*{cite:noshorthand}{%
2175 \ifthenelse{\ifnameundef{labelname}\OR\iffieldundef{labelyear}}{%
2176   {\usebibmacro{cite:label}}%
2177 \setunit{\addspace}%
2178 \usebibmacro{cite:labelyear+extrayear}%
2179   {\usebibmacro{cite:reinit}}%
2180   {\iffielddequals{namehash}{\cbx@lasthash}%
2181     {\ifthenelse{\iffielddequals{labelyear}{\cbx@lastyear}\AND%
2182       {(\value{multicitecount}=0\OR\iffieldundef{postnote})}}{%

```

12.6 philosophy-modern.cbx

The `modern` style uses the `classic` citation scheme:

```
2253 \RequireCitationStyle{philosophy-classic}
```

The `\fullcite` command simply prints the bibliography entry supplied by the style used. So we have to redefine this command in order to get the same output as that produced in the `philosophy-classic` style:

```
2254 \DeclareCiteCommand{\fullcite}%
2255   {\usebibmacro{prenote}}%
2256   {\setkeys{blx@bib2}{restoreclassic}%
2257     \usedriver%
2258     {\DeclareNameAlias{sortname}{default}}%
2259     {\thefield{entrytype}}}}%
2260   {\multicitedelim}%
2261   {\usebibmacro{postnote}}%
```

12.7 philosophy-verbose.cbx

12.7.1 Initial settings

```
2262 \RequireCitationStyle{verbose-trad2}
2263
2264 \newtoggle{cbx:sauthorscite}
2265 \newtoggle{cbx:latinemph}
2266 \newtoggle{cbx:commacit}

Change History

v0.4	General: Improved compatibility for biblatex version 0.9	1	v0.7a	General: Added command <code>volumfont</code> . Added command <code>footcitet</code> . Updated documentation	1
v0.5	General: Added new bibliography style <code>philosophy-verbose</code> . Added local- ization file <code>italian-philosophy.lbx</code> . Added package options <code>origparens</code> , <code>origbrackets</code> , <code>latinemph</code> . Changed package options <code>scauthors</code> , <code>scauthorscite</code> , <code>scauthorsbib</code> . Renamed file <code>biblatex-philosophy-doc.tex</code> to <code>philosophy-authoryear-doc.tex</code> . Added file <code>philosophy-verbose-doc.tex</code> . Updated documentation	1	v0.7b	General: Removed package option <code>romanvol</code> . Added package option <code>volumeformat</code> . Added package option <code>editionformat</code> . Activated the option <code>singletitle</code> for style <code>philosophy-verbose</code> . Added bibli- ography driver <code>@review</code> . Added bibli- ography string <code>cit</code> . Added bibliography string <code>reviewof</code> . Updated documenta- tion	1
v0.6	General: Added localization file <code>italian-philosophy.lbx</code> , <code>origfieldtype</code> option. Added <code>nodate</code> bibliography string. Updated documen- tation	1	v0.7c	General: Fixed some bugs. New <code>origfieldtype</code> option. Added <code>nodate</code> bibliography string. Updated documen- tation	1
v0.7	General: Removed package option <code>colonloc</code> . Removed package options <code>origparens</code> , <code>origbrackets</code> . Added package options <code>origfieldsformat</code> , <code>publocformat</code> , <code>commacit</code> , <code>inbeforejournal</code> , <code>romanvol</code> , <code>volnumformat</code> . Added com- mand <code>volnumpunct</code> . Added citation commands <code>\sdcite</code> , <code>\ccite</code> . Updated documentation	1	v0.8a	General: New <code>entrysubtype</code> field for cit- ing classical texts. New <code>related</code> field mechanism. New <code>relatedformat</code> op- tion. New English documentation. Fixed some bugs	1
v0.8b	General: Added <code>biber.conf</code> configura- tion file	1	v0.8c	General: Removed <code>biber.conf</code> configura- tion file. Added internal <code>biber</code> settings	

with \DeclareDriverSourcemap command. Added <code>trans-</code> field alias	1	mented cross-referencing mechanism for <code>@inproceedings</code> entries. Improved <code>\ccite</code> command. Changed the values for the <code>entrysubtype</code> from <code>classical</code> to <code>classic</code> . Added <code>nodate</code> package option.	1
v0.8d			
General: Fixed some bugs related to <code>\DeclareDriverSourcemap</code> , <code>\ccite</code> , and <code>@review</code> entry type	1		
v0.8e		v0.8f	
General: Improved <code>relatedformat</code> option for cascading entries. Imple-		General: New option <code>nodate</code> for <code>\printbibliography</code> command	1

Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
