

**Nanawo Akari Collection** is a 16 file hard chordjack pack.

(Discommunication Break, Hello Dystopia are Tech, and Kanzen Houki Sengen is a Dump in lowest difficulty, finally, Dameleon Heart and Higher's High are Stream in lowest difficulty.)

In this pack, I made extremely difficult maps for a year, and now I have enough beatmaps to make a pack only for her songs.

These maps are for advanced players who can control over 33 level. However, most of players can't play these fierce difficulty, I made some easy Jump/Handstream beatmap for intermediate players.

Anyway, good luck for playing this pack. Thank you!
